Certificates of Insurance / Proof of Insurance

What is a Certificate of Insurance?

A certificate of insurance is a document used to provide information on specific insurance coverage. The certificate provides verification of the insurance and usually contains information on types and limits of coverage, insurance company, policy number, additional insured, and the policies' effective periods.

Although the certificate should not be substituted for information contained in the actual insurance policies, it is usually a reliable source of information or proof of insurance coverage.

Certificates are usually requested by opposite parties in an agreement, contract, or transaction to make certain the other party has the appropriate insurance coverage.

Contracts requiring evidence of insurance and additional insured coverage for third parties should follow the procedures and Insurance Requirement amounts set forth herein.

Contractors / Service Providers on County Property

Why We Require Insurance

There are obvious reasons for the County to require insurance. The County uses a written contract form for County contracts that includes both an insurance requirement and an indemnity clause. Insurance is for the benefit of the Contractor as much as it is for the County. Contractors/Service Providers must sign an agreement which has an indemnity agreement that requires the Contractors/Service Providers to indemnify and defend the County for any loss or damage caused by the Contractors/Service Providers, sub-contractors or anyone in their party. The insurance provides the ability to meet that obligation. It also protects the Contractor/Service Provider against risks. For example, if someone tripped over an electric extension cord that the Contractor/Service Provider brought onto County property to run a tool, the person who tripped over the cord might sue the Contractor/Service Provider as well as the County. The Contractor/Service Provider would thus also benefit from insurance coverage.

The requirement for insurance also provides protection for the County for property damage done to its facilities by the Contractors/Service Providers through work performed pursuant to contracts.
Insurance Requirements / Contractors & Service Providers

Basic Contract Wording For Indemnity & Insurance Clauses for Letter or Contract

All Contractors or Service Providers should have a contract for services with the County. A letter agreement may serve as the contract, but must be signed by both parties. In addition to the basic information of “who, what, where, when and why” for services rendered, the contract should include a paragraph on indemnity and a paragraph on insurance. While these are elements related (the insurance guarantees that the named party will have the resources to meet its indemnity agreements) they are legally distinct, and must not be linked in the contract, or placed in the same paragraph.

The paragraphs should read:

Indemnity Agreement

To the fullest extent permitted by Law, the (named party) will defend, indemnify and hold harmless (legal name: Alamance County), including its officers, agents and employees from and against claims, damages, losses and expenses, including but not limited to attorney's fees, arising out of, or from the performance of its operations or services, or any act, omission, claim or loss of any of its officers, agents and employees or any other party they are responsible for, regardless of whether or not such claim, damage, loss or expense is caused in part by a party indemnified hereunder. Such obligation shall not be construed to negate, abridge or reduce other rights or obligations of indemnity that would otherwise exist in the absence of this agreement.
